

N. Adhithya

Kumbakonam, Tamil Nadu | +91 93632 58852 | adhithya252007@gmail.com
[linkedin.com/in/adhithyanavaneethakrishnan](https://www.linkedin.com/in/adhithyanavaneethakrishnan) | github.com/Adhi426

EDUCATION

V.S.B. Engineering College

Bachelor of Technology in Information Technology (CGPA: 8.47 / 10.0)

Karur, India

2022 – 2026

Christ The King Higher Secondary School

Higher Secondary Certificate (HSC: 83.0%) | SSLC: 88.4%

Kumbakonam, India

2022, 2024

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, SQL (MySQL, SQLite)

Frameworks & Web: FastAPI, Next.js, React, Node.js, Express, Tailwind CSS, HTML5, CSS3

AI Systems & Concurrency: Gemini API, Multiprocessing, Concurrency Pipelines, Deterministic Guardrails

Developer Tools: Git, GitHub, VS Code, Postman, MongoDB, Linux/Bash, RESTful APIs

EXPERIENCE

Full Stack Developer Intern

Workora

Sep 2026 – Present

Remote

- Building modular web application components and backend micro-endpoints using modern full-stack frameworks.
- Optimizing relational database queries and application state pipelines to ensure sub-second response times.

Full Stack Development Intern

CodeAlpha

Jul 2026 – Aug 2026

Remote

- Engineered two end-to-end MERN-stack web applications: a social platform (VYORA) and retail engine (NEXORA).
- Implemented secure JWT authentication, relational user schemas in MongoDB, and persistent cart state handling.

Campus Ambassador

Gidy · CStream Solutions

Aug 2026 – Present

Remote

- Selected for a professional technical leadership initiative, leading developer outreach and student engagements.

KEY PROJECTS

SentinelRisk AI – Autonomous Fraud Copilot | Python, FastAPI, SQLite, Gemini API, Pydantic

- Architected a fraud investigation platform with strict separation between a deterministic rule engine (velocity, off-hours spikes) and an LLM layer, completely eliminating hallucinated risk scores.
- Developed automated compliance audit trails, structured JSON risk telemetry, and safety validation boundaries.

Agentic Commerce Gateway | Next.js, TypeScript, Razorpay API, Tailwind CSS

- Created an autonomous AI-agent transaction trust engine enforcing deterministic budget ceilings and inventory validation prior to checkout.
- Engineered an immutable SHA-256 hash-chained ledger guaranteeing tamper-evident audit logs for machine transactions.

Parallel Text Handling Processor | Python, Multiprocessing, Concurrency

- Designed a high-throughput text ingestion pipeline utilizing Python's multiprocessing engine to resolve CPU-bound constraints.
- Implemented worker pools and thread-safe batch processing routines to scale text transformation operations across multiple cores.

CERTIFICATIONS & COMPETENCIES

Certifications: Data Science for Engineers (NPTEL) | Full Stack Development (Thiranex) | Junior Typewriting

Languages: English (Professional), Telugu (Native), Tamil (Conversational), Hindi (Level 8 Certified)
